Mr. Rex Day
Red Emerald Inc.
P.O. Box 576
Delta, UT 84624

Dear Mr. Day:

We received a letter from Earle Foster requesting that a temporary crew bunkhouse be built on the red beryl mine property. As the mine is a considerable distance from your office base and the mine is active, this request is accepted given the following stipulations:

- 1) After mining is completed, the structure will be removed and the surrounding area reclaimed.
- 2) All sanitary and unsanitary waste will be contained and deposited in appropriate disposal facilities.

Please find enclosed a list of the mining claims which you requested from our geologist. The cost for approximately 80 pages at \$ 0.25 per page is \$20.00. Please send a check made payable to the Department of Interior Bureau of Land Management to the above address.

Also, our geologist met on site with Ron Day and Earle Foster to inspect the mining operations. It was mentioned during this visit that exploration is planned further to the west than the existing activity. Please be aware that an amended Notice must be submitted before the surface disturbing activities are to occur.

We appreciate the cooperation we have received from your company in seeing proper multiple use of our public lands. We look forward to working with you in the future. Please contact Gina Pack at this office if you have any questions.

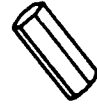

Sincerely,

Arthur L. Tait
Area Manager

Dear Ms. Pack,

We would like to request permission to build a temporary crew bunkhouse at our red beryl mine. This bunkhouse would accommodate four workers for sleeping, cooking, and shower facilities.

It will be constructed so that when our mining project is over we can remove it from the property.

Please let us know when we may start construction.

Sincerely,

Earle Foster
